Projects

Not A CV

App to help graduates find their first internship/job in UK market. Company owners can posts their job offers (web app) and graduates can looking for opportunities and apply to them (mobile app). App contains AI powered tool for recruitment automatization, where candidate profile is matched to the given role based on skills, psychometric profile, behaviours and also team dynamics.

Tech stack: *React, TypeScript, Angular, Ionic, SignalR, Websockets, SWR, ApexCharts, TailwindCSS, Recoil*

Start Grow Sell

Platform where entrepreneurs can assess their knowledge, against critical topic required to scale up their small company. Key features:
- Forum – place where people can communicate and help each other about growing their companies
- Market – here people can sell/buy advisory meetings or any kind of digital content to others
- Assessment – dynamic tool to enable variety of different assessments for users

Tech stack: *React, TypeScript, Next.JS, SWR, TailwindCSS, Redux*

Hire My Desk

Platform which allows Hosts (Office owners) to list empty desk spaces, hiring them out to guests at a fraction of the cost. Hosts have the opportunity to reclaim revenues being lost as they pay for vacant spaces, due to their teams working less days in the office than they used to.

Tech stack: *React, TypeScript, Next.JS, SWR, TailwindCSS, AzureMaps*

What's Yours is Mine

Shopping platform. Users can buy preowned high-end luxury fashion from a niche set of brands, but also sell used clothes to share their wardrobes.

Tech stack: *React, TypeScript, Next.JS, SWR, TailwindCSS*

What Would You Do

Mobile App where people can post their questions in poll format. Other people make their votes to finally visualize results with a chart.

Tech stack: *Flutter, Dart*
